Welcome to Palthalizer!

Palthalizer is a tool to visualize the paths users take when browsing your website. This gives valuable insight in how your website is used.

Please add the logfiles you want to analyze to this list:

Log files:

C:\Documents and Settings\User\My Documents\SMU\textbook05\chapter6\classlog.txt

Add...

Remove

Apache

To distinguish between local and remote referrers, please enter the hostname(s) by which you site is known (including the `http://') in this list:

Hostnames:

http://cs.stmarys.ca
